

**PRIVACY POLICY**  
*Last modified on 25/05/2018*

**Use of persona data**

Monizze uses some of your personal data to deliver your meal, eco and/or gift vouchers. The data is provided by your employer or by yourself, and may include your name, national registry number, email address, physical address and/or phone number.

We use this data in order to fulfill our contract of service. You can always access the data you have given us and rectify, limit or delete it. You can do so via your personal member account on myMonizze ([www.myMonizze.be](http://www.myMonizze.be)) or send us a message at [privacy@monizze.be](mailto:privacy@monizze.be) including your request and a proof of identification. We will reply as quickly as possible!

If you wish to use additional Monizze services and enhance your experience, you can authorize the communication of some categories of data from your myMonizze or directly from the mobile application. We will always tell you what we use this data for (for example, to recommend restaurants according to your localisation), and always ask for your explicit consent. You can change your settings anytime in your preferences.

**Your data is strictly confidential**

We never share your data with third parties except for our subcontractors and providers, who are submitted to strict data protection requirements. When your employer signs on to Monizze, we submit a list of our subcontractors participating in our service, and only work with them if your employer agrees. Your data never leaves Europe and is stored in secure datacenters.

**Data limitation and security**

Monizze is committed to processing data according to the applicable legislation, in particular the General Data Protection Regulation of April 27, 2016. In addition to our technical and operational security measures, we keep records of each process and data that we hold. This makes it easier for us to only keep the data that we actually need, when we need it. Only the persons needing access to personal data to carry out their functions are authorized to do so. Finally, we take the safety of our computer systems very seriously, and require the same from our subcontractors.

**Use of cookies**

We collect cookies to connect you to your personal area. They are automatically deleted when you exit your session. You can modify your general cookie preferences directly in your internet browser.
